

If You Suspect a Methamphetamine Lab Near Your House...

Don't investigate yourself...

*LEAVE.....Make mental note of what
made you suspicious and get out.*

You have no way of knowing which chemicals are present, whether or not the place is booby trapped, or how clean the operation is. Do not stay around to figure it out. Do not open any containers. Do not turn on, turn off, or unplug anything. Do not touch anything!

If you are extensively exposed to methamphetamine lab chemicals, wash your face and hands immediately. Call the local fire department by calling 911 if you are exposed to strong toxic chemicals or odors.

How WeTip Began

WeTip was founded in February, 1972, by Bill and Miriam Brownell. WeTip is the grandfather of all anonymous tip programs. Originally started as a citizen's self-help group to eliminate hard drug dealers, WeTip quickly expanded to take information on all major crimes.

Working together in support of trained law enforcement officers, citizens have used the WeTip system to launch a concerted attack against crime in their communities. The concept is a simple one; WeTip provides an anonymous, toll-free crime hotline to citizens who have information about a crime and want to report it to authorities without having to reveal their identity in any way.

TOTAL ANONYMITY

When you call the WeTip hotline, the first words you will hear from the tip operator will be, "this is the WeTip crimeline, please do not give your name." The operator will then ask a series of questions, designed by law enforcement, to obtain the maximum amount of information about the reported crime. After the information is taken a code name and number are assigned to the informant. The caller always remains absolutely anonymous.

WeTip information is immediately conveyed to the appropriate police, fire, and sheriff's agencies.

Arrests are never made on the basis of a telephone call alone. Arrests are only the result of verified law enforcement investigations.
